

**The Atmosphere** ▪ *Connecting Concepts*

# Connecting Concepts

Develop a concept map that uses the key concepts and key terms from this chapter. Keep in mind the big idea of this chapter: The atmosphere has measurable properties, contains pollutants, is divided into four main layers, and is made up of gases, solids, water vapor, and other liquids. The concept map shown is one way to organize how the information in this chapter is related. You may use an extra sheet of paper.
